

## 2 Day Scrum Master

### Course Description

This two day workshop is designed to provide a clear understanding of Scrum and the importance of the role of the Scrum Master. This workshop is designed to provide delegates with the necessary information needed in order to take the recognised Professional Scrum Master certification via Scrum.org.\*

### Pre-requisites

Delegates should have read the Scrum Guide (available at [www.scrum.org](http://www.scrum.org)).

### Course Content

Through attending this workshop, you will gain insights into:

- Coverage of Scrum principles and values
- Scrum roles, artefacts and meetings
- The reasons why disciplined and intelligent use of Scrum is so important

The workshop will also cover aspects of:

- The need for, and the power of, feedback loops
- The healing nature of continuous improvement
- The power of self-organising teams
- The importance of quality and the economic and personal impact of technical debt
- How Scrum can be employed to achieve business objectives and maximise ROI

Interactive sessions and engaging discussions will also take place around:

- Pitfalls of Scrum

- Scrum with traditional methods and governance
- How to deal with distributed teams
- How to start & scale
- The role of the Scrum Master
