

3 Day Agile Master Certified Course

What are the Benefits of this Agile Certified Course?

- **Understanding and Confidence with Agile**

When choosing a training programme for your team, you'll want to know that first and foremost, they will come away with a working knowledge, and the **ability to implement** what they have learned. These are key objectives on this course. We combine **practical and theoretical learning** to give your team a well-rounded experience.

- **International Certification**

Successfully completing the study and online exam for this course will lead to the **internationally recognised** Agile Master Certified (SAMC™) certification.

- **Tailoring for Your Business**

Tailoring is a key benefit of in-company training. We will be delivering training **exclusively** to your team, and so can **customise** the content to be most relevant to your day-to-day processes and challenges.

- **A Complete Training Solution**

This is a full training solution from start to finish. We guide you through the **planning and scheduling** process, include **focused classroom training**, provide access to physical and online study materials, and incorporate both **exam and certification** costs.
