

Certificated Information Systems Auditor Manager (CISA) 4 Days

Description

Enterprises demand IS audit professionals that possess the knowledge and expertise to help them identify critical issues and customize practices to support trust in and value from information systems

Exam

The event fully prepares delegates for the Certified Information Systems Auditor (CISA) exam from ISACA. Please note that the exam cost is not included with the course.

Outline

Domain 1: Information System Auditing Process (21 percent)

Domain 2: Governance and Management of IT (17 percent)

Domain 3: Information Systems, Acquisition, Development and Implementation (12 percent)

Domain 4: Information Systems Operations and Business Resilience (23 percent)

Domain 5: Protection of Information Assets (27 percent)

Overview

This event fully covers the current ISACA CISA exam syllabus by explaining how to use ITAF, ValIT and RiskIT to audit and measure an InfoSec Risk Management programme while supporting the core business strategy. Exam question techniques and study plans are also covered.

Prerequisites

Delegates should have a basic understanding of security technologies gained from 3-5 years industry experience or equivalent experience from another training event like Nemstar's CISSP Programme. A basic understanding of information systems and networking is also required.

The Programme

4 Days online classroom, instructor led workshops with supporting post event webinars
