

Certificate in Information Security Management Principles CISMP 4 Days

Description

Up to date and covering all the 9 Domains of Knowledge from the latest 2020 CISMP exam, this programme guarantees you the best possible chance of a first time pass. The industry expert led classroom course explains each topic in depth and detail with the chance to have your questions answered.

The Programme

This event fully covers the current 2020 BSC CISMP exam requirements

Exam

We do not provide the exam voucher for online courses

We don't expect the delegate to cram the in-depth materials to attempt the exam on the final day. We fully support you in that process and after the intensive 4 day course, we provide detailed exam study plans and prep materials which work alongside our unique live cram webinars to ensure your best chance at a first time exam pass at a date and time that you choose.

Course Outline

Domain 1 Information Security Management Principles (10%)

Domain 2 Information Risk (Threats, Vulnerabilities) (10%)

Domain 3 Information Security Frameworks (20%)

Domain 4 Procedural / People Security Controls (15%)

Domain 5 Technical Security Controls (25%)

Domain 6 Software Development and Lifecycle (5%)

Domain 7 Physical and Environmental Security Controls (5%)

Domain 8 Disaster Recovery and Business Continuity Management (5%)

Domain 9 Technical Security Topics (15%)

Overview

If you work in or with the UK public sector, then the CISMP qualification is particularly important to you. The CISMP certification is an approved part of UK Government's Certified Professional (CCP) Scheme, licensed by the NCSC (part of GCHQ), proves your expertise in Information Security and provides clearly defined career development paths for public sector employees.

Prerequisites

A basic understanding of information systems, servers, desktop & mobile computing and TCP/IP networking is recommended. No prior security experience is required
