

Leading Change and Projects

What is the aim of this course?

This interactive and insightful one-day training programme will equip leaders with the knowledge, skills, and tools necessary to effectively lead and manage change initiatives and projects in times of volatility, uncertainty and ambiguity.

What will I learn?

This course covers essential concepts and practical strategies to navigate the complex world of change management and project leadership. Participants will gain a deep understanding of change models, project management methodologies and leadership principles to successfully drive organisational transformation.

By the end of the training, you will be able to:

- Identify the most important focus areas when seeking to implement change and deliver projects in the 21st century.
- Learn ways to engage key stakeholders, including team members, in change and projects to deliver better outcomes.
- Explore the benefits of applying agile principles and hybrid practices in the context of change and project management and leadership.

Is it for me?

This course will benefit managers and leaders responsible for implementing change initiatives; Project managers and team leaders; HR professionals; Cross-functional team members; and anyone involved in driving organisational change and project success.
