

AI067 Red Hat OpenShift AI Technical Overview

An introduction to operationalizing AI/ML with Red Hat OpenShift AI

Course Description

- This free Technical Overview describes the current AI/ML landscape and the challenges associated with developing and deploying AI/ML applications. The on-demand video content also covers how Red Hat OpenShift AI builds on the capabilities of Red Hat OpenShift to provide a single, consistent, enterprise-ready hybrid AI and MLOps platform.

Course Content Summary

- How did AI progress to where we are today?
- How the AI/ML landscape is evolving
- Red Hat OpenShift AI Architecture
- Red Hat's AI/ML partner ecosystem
- Use case demo

Audience for this course

- Data scientists and AI practitioners who want to build and train ML models
- Developers who want to build and integrate AI/ML enabled applications
- MLOps engineers responsible for installing, configuring, deploying, and monitoring AI/ML applications

Recommended training

- There are no prerequisites for this Technical Overview.

Technology considerations

- N/A

Course Outline

- Introduction
- A brief history of AI
- What is machine learning?
- What is deep learning?
- Where do foundation models fit within AI?
- The evolving AI/ML landscape
- The challenge with MLOps
- Operationalizing AI
- Red Hat OpenShift AI features
- The Red Hat OpenShift AI open source ecosystem
- Red Hat OpenShift AI architecture
- The Red Hat OpenShift AI partner ecosystem
- Demo: Improving insurance claims process

InspiringWays Training

-
- Demo: Connection and Setup
 - Demo: Working with an LLM
 - Demo: Image processing
 - How to continue training on Red Hat OpenShift AI

Recommended next course or exam
