

## Microsoft Azure AI Fundamentals (AI-900)

### Overview:

This course introduces fundamental concepts related to artificial intelligence (AI) and the services in Microsoft Azure that can be used to create AI solutions. The course is not designed to teach students how to become professional data scientists or software developers, but to raise awareness of common AI workloads and the ability to identify Azure services to support them. The course is designed to be a blended learning experience that combines instructor-led training with online materials on the Microsoft Learn platform. The practical exercises in the course are based on learning modules, and students are encouraged to use the Learning content as reference material to reinforce what they are learning in class and to delve deeper into topics.

### Purpose

- A basic introduction to the types of solutions that artificial intelligence (AI) enables, and the services on Microsoft Azure. Do you want to pass the exam? Then you can order the Microsoft Exam Voucher Fundamentals Certification Exams for that.

### Target audience

The Azure AI Fundamentals course is designed for anyone interested in learning more about the types of solutions that artificial intelligence (AI) enables, and the services on Microsoft Azure that you can use to create them.

### Prior knowledge

Familiarity with computers and the use of a web browser. You don't need to have any experience using Microsoft Azure before taking this course, but it assumes a basic understanding of computer technology and the Internet. Some of the concepts covered in the course require a basic understanding of mathematics, such as the ability to interpret graphs. The course includes hands-on activities that involve working with data and executing code, so knowledge of fundamental programming principles will be helpful.

### Duration:

1 Day
